## LEARNING MANAGEMENT SYSTEM

Excited to share the earnings management system I have meticulously crafted using the **Astra theme** in conjunction with **Elementor**. This intuitive system is designed to streamline tracking and management effortlessly. The Home page welcomes users with a clean interface, offering a comprehensive overview. Within the Features section, users can explore detailed tools for budgeting, income tracking, and expense management, ensuring clarity and control over financial data. Courses are seamlessly integrated, providing educational resources tailored to enhance financial literacy. Leveraging Elementor's robust capabilities, I've **customized each page**—from the dynamic Home interface to the interactive Features and Courses sections—to deliver a user-friendly experience that prioritizes functionality without compromising on aesthetic appeal
